CONSTRUCTION

BUILDING A BETTER FUTURE

Innovation

We provide geotechnical investigations, construction materials testing, and special inspection services, deploying the latest technologies to ensure our clients build on a strong foundation.

Full Lifecycle Support

We are there for our clients each step of the way – from preliminary site testing and planning to construction and completion.

In-House Labs

We offer in-house testing through our full-service AASHTO-certified laboratories, helping our clients' projects progress more quickly.

Our Service

From high-rise to highway and landfill to lakes, ATC offers creative construction solutions. We have worked alongside owners, developers, builders, architects, and engineers to ensure our clients have a comprehensive support team. From environmental assessment and remediation to foundation, water intrusion, or building envelope quality assurance, we can handle any job, big or small, near or far.

ENVIRONMENTAL • GEOTECHNICAL
